

ExDifference

Create the symmetric difference of two sets (the collection of objects present in A or B, but not both).

Disjoint

Test whether two sets are disjoint.

Set Intersection

Creates the intersection of two sets.

Extrude To Boundary

Extrudes face to a boundary surface.

Split Face

Divides the selected surface of a polysurface by drawing a polyline, selected curves, or isocurves.

Extrude Face

Creates a solid by tracing the path of the surface edges in a straight line.

Move Face

Moves a polysurface face.

Extract Surface

Separates or duplicates polysurface, Extrusion, or SubD faces.

Fold Face

Rotates selected polysurface faces around an axis line.

Smaller Than

Smaller than (or equal to).
