

BIM Workflow for Landscape Architects with RhinoLands

WHERE: University of Michigan

WHEN: March 25th, 2025, 17:00 CET

On March 25, a webinar on **BIM Workflow for Landscape Architects with RhinoLands** will be hosted. This is a chance for your clients and potential users to explore how RhinoLands streamlines landscape and urban design projects with parametric tools and BIM capabilities.

RhinoLands is a standalone BIM landscaping software. The workshop follows the design process with RhinoLands by reviewing the following tools: Drawing, Terrain modeling, Hardscape, Vegetation, Visualization, and BIM documentation.

Date: **March 25, 2024**

Time: **17:00 CET**

[Free Registration](#)

Why should they attend?

- Learn how RhinoLands integrates BIM into landscape architecture workflows
- Discover powerful parametric tools for terrain modeling, vegetation, and site planning
- See a live demonstration of efficient grading and documentation
- Get insights from experts on optimizing design processes
