

Free Rhino & Grasshopper Workshop for Architects

WHEN: May 4th – May 14th, 2025

If you're an architect or designer and you've always wanted to learn Rhino, Grasshopper, or Rhino.Inside.Revit from scratch in a systematic step-by-step way, How to Rhino is hosting a free workshop for architects from May 4 to May 14.

The workshop will be hosted by Dusan and Lazar, Serbian architects and founders of the How to Rhino platform, which helps architects learn how to use Rhino and Grasshopper for architecture. How to Rhino is an authorized Rhino Training Center and all of the workshop participants will receive a certificate of attendance at the end.

Topics that will be covered and answered during the workshop:

Rhinoceros

- I don't know where to start?
- The interface looks so scary and confusing!?
- There are no specific Rhino tutorials just for architects that are exactly to the point
- I need a professional next to me to ask questions
- I want to start making organic designs that you can't achieve with other programs

Grasshopper

- What's the logic behind Grasshopper?
- Grasshopper interface is way too complex
- Beginner-friendly step-by-step approach
- Creating Grasshopper scripts from scratch
- I've never used Grasshopper, I don't know how to start?
- How to use parametric modeling for architecture with Grasshopper

Rhino.Inside.Revit

- What is Rhino.Inside.Revit?
- Connection between Grasshopper and Revit
- How to do parametric designs in Revit
- Dynamo vs. Grasshopper
- Full BIM workflow from Rhino and Grasshopper

During these ten days (May 4th to May 14th), there will be four lectures, four live events, and some surprise guests. The sessions will be recorded if you can't attend live events, but the content won't be available after May 14th.

The event is entirely FREE, but there are limited seats available, so make sure to [register and secure your spot](#) as soon as possible.
