

SAVANNA3D For Rhino – New Blocks

[SAVANNA3D](#) is a comprehensive library that includes over 1,600 intricately designed 3D architectural models, all available in the 3DM file format. Additionally, the library features a variety of parametric Grasshopper definitions, enabling users to create customizable architectural designs easily.

These models include furniture, fixtures, 2D people, office equipment, appliances, and more. You can easily insert or import them into Rhino 7 and 8, which will help you get started on your projects. These model collections are created using NURBS, SubDs, or Grasshopper parametric definitions. [Buy SAVANNA3D online!](#)

You can also buy [SAVANNA3D](#) bundled with [VisualARQ](#), a BIM software designed for use with Rhino versions 7 and 8.

[Explore the new blocks](#) specifically designed to meet your needs. The latest set includes 16 models related to bathrooms, complete with instructions on how to apply materials to a block in Rhino 8.

Subscribe to the [SAVANNA3D](#) library to download the entire library; it's yours to keep for as long as you like. Please refer to the License Agreement. The subscription includes all 1,600+ blocks, plus any new blocks added sporadically during the twelve-month subscription.
