

Shape to Fabrication 2025

WHEN: Monday, April 14th – Rhino New Developments Day

Tuesday, April 15th – STF Workshops

Wednesday, April 16th & Thursday, April 17th – Main 2-Day STF Conference

The 9th iteration of our popular Architecture, Engineering and Design (AEC) Focused Conference, will take place in April 2025.

In partnership with the School of Architecture and Cities, University of Westminster, we look forward to welcoming new and old friends to the Shape to Fabrication community.

Announcing soon will be news on the [STF Conference early-bird ticket sale](#), until then please save the date and we hope to see you in London next year!

The full Shape to Fabrication 2023 Line-up and Photo Gallery is available at the STF website. Visit the site to see what happened in 2023 and to sign-up for the Shape to Fabrication newsletter.

ABOUT SHAPE TO FABRICATION

The **Shape to Fabrication**® conference has a focus on cutting-edge technology, innovative construction with applications in architecture, engineering and design. Our speakers are shaping the future, working at the intersection of technology and design innovation, unafraid to push technology and engineering to new heights.

We live in an unprecedented time. An age where buildings are moving, jewellery is printed, clothes are sprayed on, facades are folded by robots and cars are made of textile. We are proud to present to you the first to use such pioneering technologies to create these magical experiences.

Discover the latest approaches in digital fabrication and computational design from an international panel of presenters – Architects / Engineers / Fabricators / Artists.
