

VisualARQ 3 Released!

Dear Rhino Enthusiasts,

We are thrilled to announce that [VisualARQ 3 has been released!](#) This new version brings a wealth of new features and improvements, making it a monumental leap forward in the capabilities of Rhino for architectural projects.

VisualARQ 3 is compatible with both **Rhino 7 and Rhino 8**, and it is the culmination of several years of dedicated development, incorporating the [most requested features from our user community](#). We have addressed more than 1,000 requests, transforming user feedback into a powerful and versatile tool.

WHAT'S NEW IN VISUALARQ 3?

Here are some of the most exciting new features you can look forward to:

- **Objects Link to Levels**
- **IFC 4 Support**
- **Dynamic Table Report Panel**
- **Buildings with Boundary**
- **Clashes and Clearances Report**
- **Reflected Ceiling Plans**
- **Guides**
- **Walls and Curtain Walls from Grasshopper Styles**
- **Objects Intersections and Interferences**
- **Profile Manager**
- **Export Layouts to DWG**

And many more!

To see these features in action, you can check out our [VisualARQ 3 introductory video](#).
