

Parametric Sculptures for PUMA: Digital Precision in Antofagasta

A pair of monumental parametric pumas, installed at PUMA's Antofagasta store, showcases how digital design, CNC fabrication, and meticulous layering can transform feline anatomy into striking sculptural forms.

Sea N See: Where Parametric Design Meets CNC Craftsmanship

The Sea N Sea project showcases the creative potential of combining parametric design with CNC technology, using Grasshopper and RhinoCAM to transform visual inspiration into a striking, textured panel.

Medio Design Collaborates to Illuminate El Corte Inglés

This light, translucent, yet strong luminaire was created with carefully chosen materials and influenced by Japanese aesthetics. The design is suitable for busy areas, in this

case, a department store.

Elevating Surfing to New Heights

Utilizing advanced lithium battery packs and carbon fiber hydrofoils to create a sensation of flying over water, Lift Foils provide an exceptional water experience with powered and non-powered hydrofoil surfboards.
