

ShaperBay: A Browser-Based Platform for Custom Surfboard Design and Fabrication

ShaperBay is a browser-based platform that empowers users to design and export custom surfboards using parametric tools powered by Rhino and Grasshopper. Its standout Hollow Wood Structure (HWS) feature supports the fabrication of sustainable, high-performance wooden boards through laser-cut templates and intuitive digital workflows.

Sfered: Custom Eyewear Meets Grasshopper

Shape Diver interviewed Sybren de Graaf, CEO and founder of Sfered, who created an innovative solution for the eyewear industry using Grasshopper and ShapeDiver's infrastructure.
